YREKA UNION HIGH SCHOOL POLICY/CONTRACT

The following is a school-wide policy on student responsibilities while using computer, printers, digital cameras, digital video cameras, and other technology on campus. The purpose of this policy is to inform parents and students of the rules as well as the fees involved if the student steals, damages, or destroys equipment.

COMPUTER LAB RULES

1. No food, drinks (including water), gum, or candy should be anywhere near a computer.
2. Ask the teacher to exchange a bad keyboard or mouse, so that someone isn't falsely fined for damages.
3. Always check your computer at the beginning of class for problems and damage. Report all instances immediately to the teacher.
4. Do not attempt to "hack" or otherwise modify the computer and how it functions. This includes tampering with exposed parts of the computer. Do not insert items into open computer parts that should not be inserted.
5. Do not install personal software onto computers.
6. Treat all technology with respect and care.
7. Do not go to inappropriate web-sites.

CONSEQUENCES

Any damage or theft will result in a fee on a student's profile. Students mistreating their technology privilege may lose temporary or permanent access to the computer in addition to disciplinary measures issued by the teacher or administration. If students lose access permanently and they're in a computer-based course, they will have their schedule changed or class will count as an Incomplete/Fail.

Please sign and date this policy to acknowledge that you've read the rules and have seen the potential consequences. Computers are a great tool in education and we want all of you to enjoy them. We also want to keep them functioning for every one's benefit and this is only possible through your cooperation.
